## Pettengill Scores Laski's Ideas as

Gall and Nonsense

Dear Professor Laski:

Surely if the opinion of British holders is sought, there is every reason to believe that the opinion of American citizens who own almost all of the General Motors shares would be equally interesting to the union folks. Some of these stockholders may be reticent about expressing themselves but, since this is a democratic country and the views of workers are canvassed with the help of the government under the Smith-Connally law, it might be worth the experiment to have the federal establishment take a vote among stockholders, too.

Disadvantage Seen

Such a course might possibly redound to the disadvantage of the union side, because stockholders, rarely favor the granting of concessions which might conceivably affect their dividends. Modern managements, indeed, in some large companies have quite a difficult time justifying their attitudes toward labor and the chances are that stockholder groups would be found even more opposed to the wage increases at this time han are the management executives. But, in any event, there is merit in having the views of both sides comprehensively stated. Thus, General Motors is a large corporation with tens of thousands of stockholders from every walk of life. ## LIBERTY TRUST PERSONAL LOAN

It's good business to consolidate all your debts, wipe the slate clean, and start 1946 with only one monthly obligation to meet.

A personal loan puts family financing on a sound basis. Anyone of good credit standing can borrow at this bank at the regular bank interest rate of 6%. \$100, for example, costs you only \$8.84 per month for 12 months.

in loving memory of Vernon J. Willard in wes killed in Luxembourg. December 1944.

There's a memory trail that winds away,

Along the trail of friendships true.
I take the lonely road to Luxembourg and you.

Gone but not forgotter AUNT BERNICE AND GRANDMOTHER.

Clarence McKenzie, Cresaptown, machinist at the plant, is inspecting Miss Chase's machine. While production now is underway on a small scale, no shipments have been made to date. Officials of the company say that within six months they will have 325 machines in operation and 480 feet of cutting table. Peak employment is expected to reach 500 persons, mostly women. Once production gets on a bigger scale, Mrs. Scotty will train sectional supervisors of instruction from among local women who show special aptitude for the work. He said the company wants to give full opportunity to all women who started training at the plant but have since became ill. He added that their jobs will be held open for them.

Officials of the company say that within six months they will have 325 machines in operation and 480 feet of cutting table. Peak employment is expected to reach 500 persons, mostly women. Once production gets on a bigger scale, Mrs. Scotty will train sectional supervisors of instruction from among local women who show special aptitude for the work. Maurice Millberg, plant manager, said yesterday that an upsurge of illness here has retarded the training program. He said the company wants to give full opportunity to all women who started training at the plant but have since became ill. He added that
